# Registering your students

# Registration options

Registrations can be made either through Walled Garden catalogue, or through EDI (Electronic Data Interchange). Registration for the Core Component and the Occupational Specialism (OS) must be made at the same time (they can be completed in the same transaction). If you do not complete the registrations accurately, you may not meet the requirements for the relevant funding.

Providers are unable to register a student for an OS before registering them onto the Core Component. When making a registration through EDI, you must first upload a file to make registrations for the Core Component, and then a separate file to make registrations for the OS.

Providers will incur additional fees for any registrations made after the standard registration window has closed.

# Registration fees and refunds

Registration fees are attached to the Core Component only.

No fee is attached to registration for the Occupational Specialism (OS), unless this was made within the late or very late registration windows (late registration fees apply).

## Fees

The full list of fees are published for each Technical Qualification.

You can find these under the fees section of the [T Level Resource Hub](#).

## Refunds

If a student's registration is cancelled by 31 January of the same academic year, the provider will receive a full refund (including late and very late fees).

If a cancellation is completed after 31 January, City & Guilds will not provide a refund of any fee associated with T Levels registration or assessment entry, even for cancellations completed within 30 days of the booking. See the next slide for further information.

# Refunding of cancelled registrations

## Cancellations prior to 31 January

Prior to 31 January of each academic year, registration cancellations should be requested by contacting Customer Support using the contact information as detailed on page 58 of this guide.

## Requests for registration cancellations after 31 January of each year

After 31 January, any students who have withdrawn from the Technical Qualification should be notified to City and Guilds in accordance with the Delivery of Results (DoR) Checkpoint activity as detailed on Slide 19.

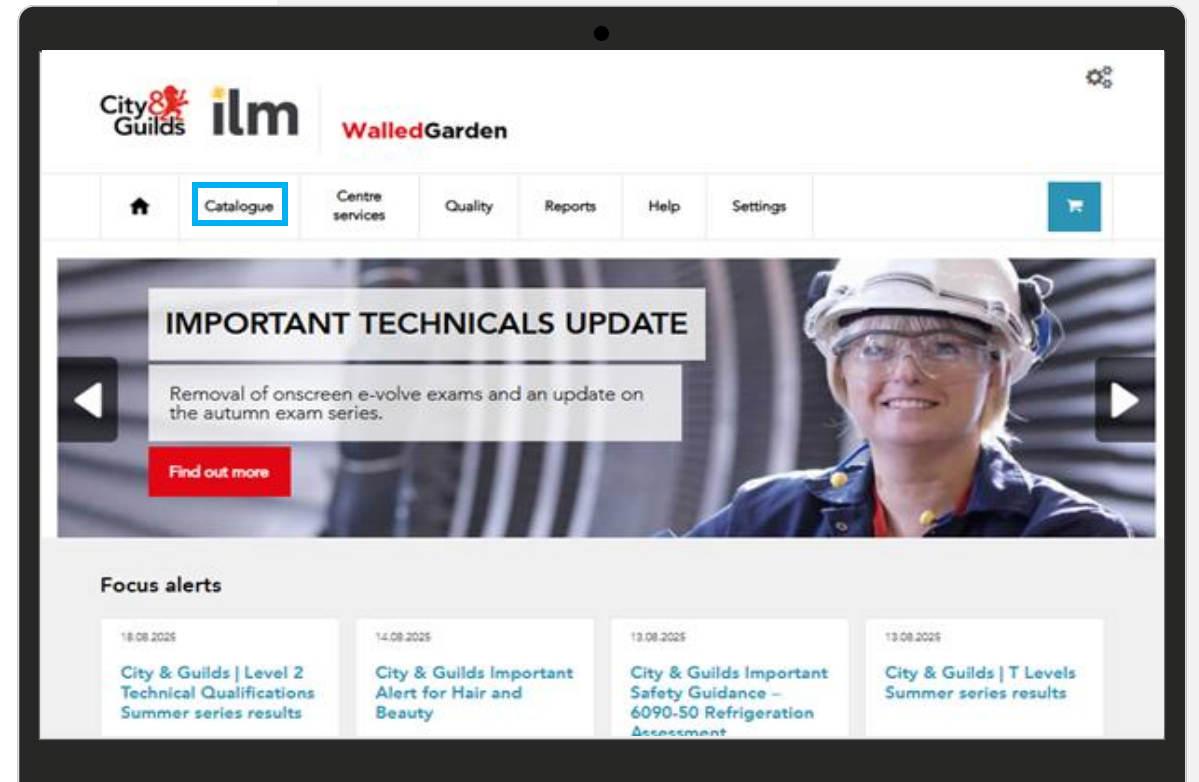

City & Guilds will not provide a refund of any fee associated with T Levels registration or assessment entry after this date, even for cancellations completed within 30 days of the booking.

# Withdrawing students from T Level Technical Qualifications

## Withdrawing students

If a student was registered on a T Level Technical Qualification but withdraws from the course prior to 31 January of the **same academic year**, providers are encouraged to inform us of this, and the registration fee will be refunded. We must be notified of this prior to **31 January** for the registration fee to be reimbursed.

Please contact [customersupport@cityandguilds.com](mailto:customersupport@cityandguilds.com)

We will not process any registration cancellations or withdrawals after 31 January via customer services. Providers must then provide the withdrawal confirmation through the annual Delivery of Results (DoR) checkpoint activity (this was previously referred to as VTQ Checkpoint).

The DoR checkpoint activity requires providers to inform us of the certification intention of all registered students. We must be notified of all students who have withdrawn from their course.

More information can be found on our [VTQ Information Hub](#).

If you require any support with this, please contact [centreoperations@cityandguilds.com](mailto:centreoperations@cityandguilds.com)

# Withdrawing students: results

If a student has attempted any T Level component before being withdrawn from the programme, their results will **not** be removed or deleted.

# Assessment entries (bookings)

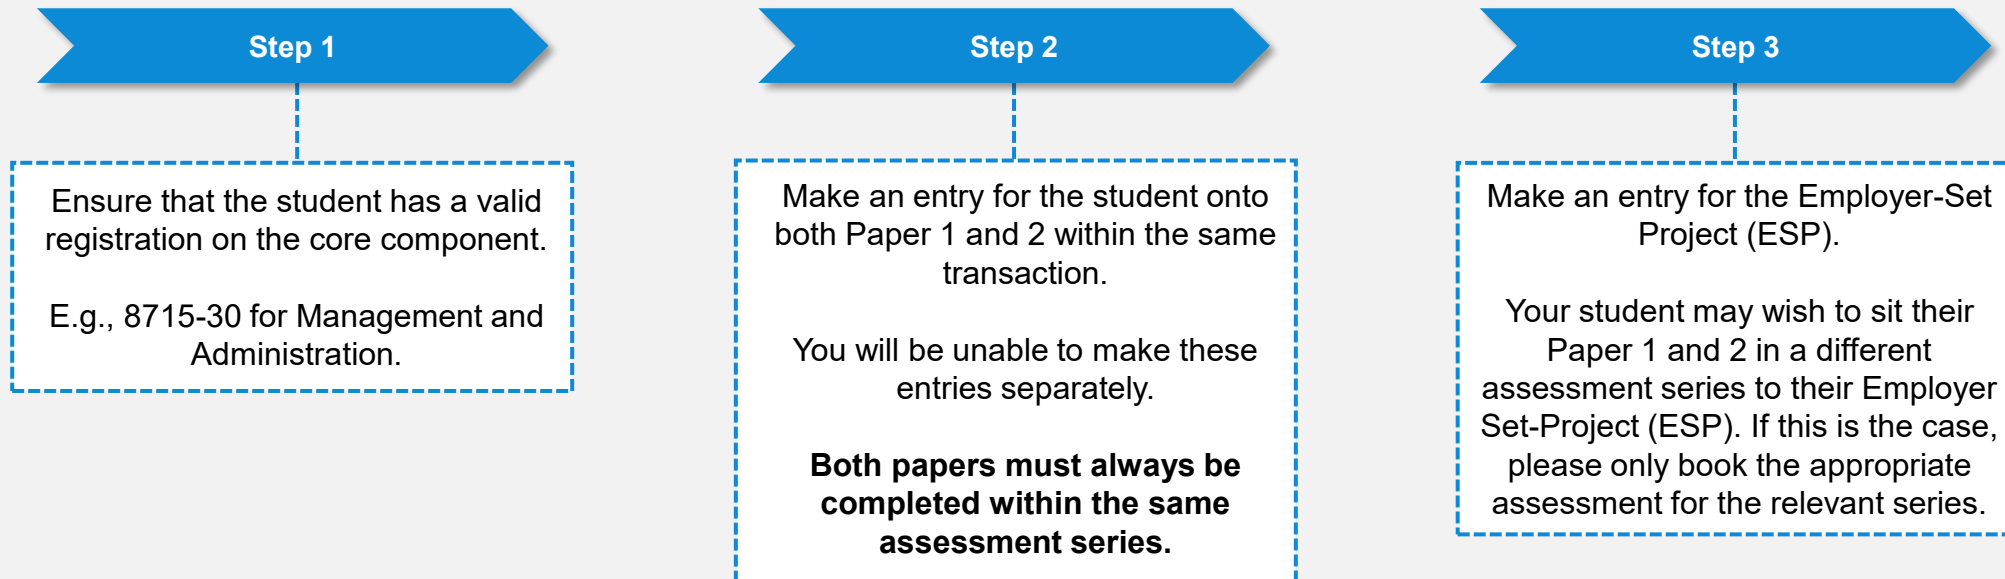

# Entry information

Providers can make assessment entries for their students onto the Core assessments (Core exam paper 1, Core exam paper 2 and the Employer-Set Project) from:

- Early January for the Summer Series standard entry window
- Early September for the Autumn Series standard entry window

Providers will not be charged for an assessment entry, as long as it is a student's first attempt, and if the entry is made within the standard entry window.

# Entry fees

Entry fees for assessments only apply where it is a resit or where the entry is made in the late or very late entry window.

## Fees

The full list of fees is published for each Technical Qualification.

You can find these under the Fees section of the [T Level Resource Hub](#).

# Entries for the Core assessments

Providers should enter students onto Paper 1 and Paper 2 as part of the same transaction.

If you attempt to make an entry onto a single paper in Walled Garden, you will be forced to book onto the other as well.

Both papers must be completed within the same assessment series (e.g. Summer).

Therefore, if a student chooses to resit one or more papers, then they will need to resit **both** papers within the same assessment series.

Fees apply for any resit of the core assessments.

## Entries for the ESP

Your student may wish to sit the first attempt of their Paper 1 and 2 in a different assessment series to their Employer-Set Project (ESP).

If this is the case, please only book the appropriate assessment. We no longer require the first attempt of all assessments to be sat in the same series.

A student's resit of the ESP can also be completed in a different assessment series to Paper 1 and Paper 2.

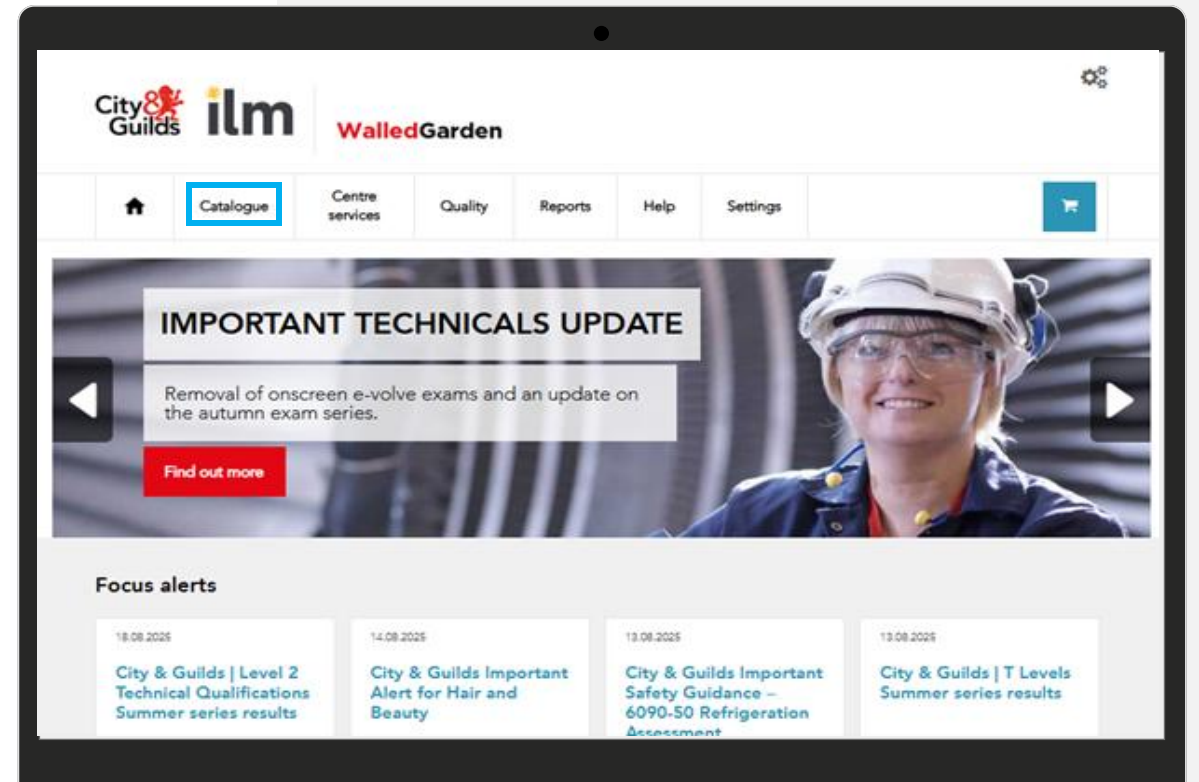

The ESP assessment entry does not need to be made at the same time as Paper 1 and 2. However this is strongly recommended if the student is taking the assessments in the same series, to avoid a missing entry.

# Place an assessment entry

First, please log in to Walled Garden.

Once logged in, click on **Catalogue**, which will take you to a list of your approved qualifications.

# Place an assessment entry

## Reference

This will either be the assessment code, or the system generated code for either the sub-component and/or core component results, and/or Occupational Specialism.

## Mark

This is the raw mark for the individual sub-component exams, the Employer-Set Project (ESP), and the Occupational Specialism.

The raw marks for the core exams can be used by centres to indicate candidate performance using the published Notional Grade Boundaries. However, these are for illustrative purposes only.

## Grade / Status

The grade achieved will display for each of the sub-components and then the final grade achieved for the overall core component

For the individual exam components, a grade is not published, this will display as either 'Attempted' or 'Absent'.

## Uniform Mark Scale (UMS)

Candidates' raw sub-component marks will be converted to a Uniform Mark Scale (UMS). The UMS is used to convert the sub-component 'raw' marks into uniform marks. This is done to standardise marks from one series to another as assessments may vary in difficulty.

# Understanding the T Level Result Slip

## Result Type

The T Level 'Core' is broken down into Sub-component level and the individual assessment level.

The **core component** is the combined result for the core assessments (Exam papers 1 and 2, and the ESP). The candidates' overall Core result is calculated using the best sub-component results from across all series.

The **sub-components** for the core are;

1. the combined result for the core exams.
2. the result of the ESP

## Series

This will display which series' sub-component results are being used to determine the Core result.

The best sub-component results being utilised are displayed in the 'Contribution from:' section

In this example, the candidate re-sat the Employer-Set Project in Summer 2023 (displayed in the top table), but it was their Autumn 2022 result which was better (higher UMS displayed in the bottom table) and hence contributing to the overall Core result.
